

SANU DAS: THE BUDDING ENGINEER

“There are some people who live in a dream world, and there are some who face reality; and then there are those who turn one into the other.” – Douglas H. Everett

17 years old Sanu Das is an interesting combination of both kinds of people; a dreamer and a realist. While he is fully aware of his humble reality, he also dares to dream.

Sanu grew up in a nuclear family in Raghbir Nagar, New Delhi. His father, Mr. Chittaranjan Das, is a factory worker. The family is originally from Cooch Behar, West Bengal. They moved 25 years ago in search of better opportunities and have lived here ever since. While the family is facing difficulties at the

financial front, his parents do not wish to compromise with his studies and want him to work hard and excel in future.

He started taking remedial classes at CSSAR’s Raghbir Nagar centre since 2011 and always dreams of rising up in life. And that conviction is visible in the way he envisions his life ahead. He wishes to be an engineer when he grows up. He says that he likes to create things. He further elaborates on it and tells us how he has repaired small electrical and electronic gadgets at home with the help of his tool kit.

Sanu scored 82% in 10th board exam, 2020 and got admitted in Govt. Boys Sr. Secondary School, Rajouri Garden in science stream. Not only he excelled in 10th board result but he also got the highest mark in Math in his school. And 2021 welcomes him with wide arm, as he gets the chance to pursue his dream of engineering. He gets admitted in the ACMT College, Uttam Nagar Campus for the course of diploma engineering in Computer Science.
