Objective Of The Project

- Awareness drive in Ladakh to Boost Tourism
- Promotion of science and technology in Kashmir

Biodiversity Impact in Pirpanjal Range

- Birds Conservation

Objectives of condensed course:

The main focus of the scheme is to ensure that contents of the course are need-based and modified according to local requirement, simultaneously targeting various stages of educational levels of primary / middle / high school and matric / secondary level courses. The programme also aims at instilling confidence among adult women through education making them able citizens. Selection of candidates is required to be done by a committee comprising the institution and the Principal / representative of a local government school of the area where the course is to be held. The Scheme is being implemented through Voluntary

1.

Organizations and educational institutions, having requisite infrastructure and experience in the field of women / social development and education across the country.

2. Objectives of TB Care and Control

- Encourage the development of high quality curricula in schools of medicine or osteopathy that will significantly increase the opportunities for students, house staff, and others, including practicing physicians and nurses, to learn the principles and practice of preventing, managing, and controlling TB
- Develop and implement interdepartmental programs with common goals and
-
- standardized diagnostic and therapeutic approaches
- Promote interdepartmental communication between primary care and other specialists to ensure appropriate control and treatment strategies
- Encourage applied research in the control of TB
- Promote the development of a faculty capable of providing appropriate instruction in

diagnosis and management of TB, with special emphasis on minority faculty, nursing, and infection control personnel

- Promote coordinated clinical approaches to the care of patients of various ages and ethnic groups who have TB
- Provide for outreach programs from medical centers to health practitioners in the community, especially home care agencies, to enhance optimal care, especially in areas of high TB morbidity
- Update the knowledge and skills of practicing physicians, nurses and other health care providers in the community
- Focus educational efforts on health care providers in areas where there is a persistently high incidence of TB, such as in immigrant communities, refugee centers, shelters for the homeless, and in correctional facilities
- Enhance the awareness of health care providers of the unique ethnic, cultural, socioeconomic, and medical dimensions of TB
- Coordinate and collaborate with other community organizations to control TB in areas with a high incidence of TB
- Facilitate an interchange of ideas and methods between awardees and institutions
- Enhance tuberculosis education programs in minority medical schools and promote TB education in the communities served by these institutions

3.

Objectives of HIV/AIDS awareness:

The Programme will continue to create awareness and educate the general public on the following:

- **the seriousness of HIV/AIDS**
- **the different modes of transmission**
- **behaviors that can put one at risk of HIV infection, such as having casual sex, having multiple sexual partners, having sex with commercial sex workers, injecting drug use, and receiving blood that is contaminated with HIV**
- **the importance of maintaining a safe, single-partner relationship**
- **the importance of going for early and regular HIV screening if one thinks that he or she is at risk of HIV infection**
- **reducing the stigma against people living with HIV/AIDS (PLHIV)**

4: Objectives of Environmental Campaign

The objectives and guiding principles for developing environmental education are as follows:

(a) Awareness:

To help social groups and individuals acquire awareness and sensitivity to the total environmental and its allied problems.

(b) Knowledge

To help social groups and individuals gain a variety of experiences in and

Acquire a basic understanding of the environment and its associated problems.

(c) Attitude:

To help social groups and individuals acquire a set of values and feelings of concern for the environment and motivation for actively participation in environmental improvement and protection.

(d) Skill:

To help social groups and individuals acquire skills for identifying and solving environmental problems.

(e) Evaluation ability:

To help individuals and social groups to evaluate environmental measures and education programs in terms of ecological, economic, Social, aesthetic and educational factors.

(f) Participation:

To provide social groups and individuals with the opportunities to be actively involved at all levels in working towards the resolution of environmental problems

4. Objectives o Total Sanitation Campaign:

The main objectives of the TSC are as under

- Bring about an improvement in the general quality of life in the rural areas
- Accelerate sanitation coverage in rural areas
- Generate felt demand for sanitation facilities through awareness creation and health education
- Cover schools/ Anganwadis in rural areas with sanitation facilities and promote hygiene education and sanitary habits among students
- Encourage cost effective and appropriate technologies in sanitation
- Eliminate open defecation to minimize risk of contamination of drinking water sources and food
- Convert dry latrines to pour flush latrine, and eliminate manual scavenging practice, wherever in existence in rural areas
