

Annual Report 2015-16

Foreword

Dear Friends,

It gives me great pleasure to speak today as the Vice President of ABMSS.

First -a big congratulations for the entire team of ABMSS.

The last year has been a good year with a lot of interesting things happening for our organization. We have seen 2146 smiles restored, the successful opening of a number of new cleft centers, launching of fellowship programmes, outreach programmes and successful fund raising activities and campaigns like the “100 smile drive”.

Special mention for our doctors, support staff, goodwill ambassadors and donors without whose untiring contributions none of this would have been possible.

Having said that we are far from the truth off our mission of eradication of cleft in India. Our efforts to increase awareness and acceptance must continue to prevent these kids from being ostracized from the society. They do have a chance to live gracefully.

Our vision “what it means to have a better life through better smiles” needs to be realized through our continued efforts of engaging both society and governments.

Let us make this happen by bridging the gap-

For a smile is individual to that persons, forever present and forever part of them.

Thank you to our donor, Deutsche Cleft Kinderhilfe e.V. for creating this opportunity to be a part of a cause which lights up a million lives.

Good luck and Godspeed to all.

Dr. Ashish Shetty

The Projects

In India, the aid for Cleft children stands on a very solid and high-quality fundament. In the centers of Agra, Ahmedabad, Bangalore, Bhubaneswar, Coorg, Delhi (Noida), Mangalore, Mumbai, Mysore, Patna, Pune, Raigarh, Raipur, Surat and Vishakhapatnam a total of 2,392 operations have been performed along with many continuative treatments.

The interdisciplinary and comprehensive treatment of patients is at a high level and was further strengthened during the year. Still, it is very difficult to ensure that operated children whose families come from poor backgrounds and sometimes need to undertake up to a day's journey to the next Cleft center, go to the next treatment.

A new and creative way had to be tried! Therefore, we have implemented a project in Mysore to allow operated cleft children from remote villages to stay in the center for up to ten days in order to receive an intensive therapy in the field of voice and functional therapy. Our Indian center directors and surgeons know that a long-term care and the normalization of bite (tooth position), speech, hearing and facial proportions tremendously push the self-confidence of cleft patients and their integration in the community.

Our charity as a whole has chosen to provide high-quality medical care while at the same time a high number of new cases are to be treated at the centers. We have observed again in the reporting year that in India too many cleft patients were operated improperly (by other surgeons who are not known to us) and the number of necessary functional surgical corrections increased. The installation and financing of quality Cleft centers is more important than ever. In this respect, we were on an expansion path also in 2015/16 with the establishment of the Cleft center in Raigarh and Raipur and we are going to pursue this strategy in 2016/17. Annually, up to 50,000 children are born with a cleft lip and palate in India. The backlog of unoperated cleft patients of estimated one million affected people only imperceptibly reduces. Approximately every tenth Cleft child in India dies before reaching 1 year of age! Given this dramatic situation for the families concerned, and in view of the great need for assistance, India remains the most important project country for Deutsche Cleft Kinderhilfe, our partner organization.

The Graphic displays the project locations supported under ABMSS in the fiscal year, 2015/16.

The Projects

The 2016 Annual Meet of our Partner Surgeons cum Workshop, Visakhapatnam

Our surgeons and therapists from India, together with DCKH CEO Mr Alexander Gross, ABMSS General Secretary Mr Dushyant Prasad.

Cleft center Coorg / Karnataka (Prof. BS Jayanth)

In Coorg Dr. Jayanth operates in Coorg Institute of Dental Sciences. The region is one embedded in coffee plantations and rainforest. The children come from very poor and fair comparison, their parents often work as day laborers on coffee plantations or rice fields . When Dr. Jayanth the young patients are in the best hands. The gentle surgeon manages every time to calm the parents and the kids before surgery. The Coorg Institute of Dental Sciences also has excellent orthodontic department.

Cleft center Mysore/ Karnataka (Dr. Manu Prasad S)

Dr. Manu Prasad has been connected to the German Cleft Children's Aid Society since 2006. First, he was an assistant in the cleft center Ahmedabad, later he became a senior surgeon in Mangalore and Bangalore. Thanks to our partner association - the Swiss Children's Aid Society - we were able to assign him our first own cleft centre in Mysore in August 2013. The center is located at St. Joseph's Hospital and has been working in an interdisciplinary way from the beginning. The surgeon, orthodontist, dentist, speech therapist, pediatrician and anesthetist are all located on the same floor.

Cleft center Patna / Bihar (Dr. Uma Shankar)

In India's poorest state Bihar some 100 million people live on just under 100,000 km². The capital Patna is the second largest city in Northern India after Kolkata. Providing a contact point and place to go for families with cleft children had long been our goal. Dr. Shankar operated diligently and with great commitment and the need for help is huge. The population can not afford medical treatment. Dr. Shankar performed 236 surgeries in the reporting period!

Cleft center Surat / Gujarat (Dr. Nehal Patel)

Surat is a large Indian industrial city which is located not too far north of Mumbai. Dr. Patel is not only a good surgeon, but also a good organizer. Originally designed as a small center, the number of operated children, the majority of whom coming from rural areas, is rather high. Also in 2015/16, Dr. Patel again organized many information Camps in the countryside and could help many cleft children from very poor families. He performed a total of 138 operations.

The Projects

Cleft center Agra / Uttar Pradesh (Dr. Gaurav Gupta)

The children operated by Dr. Gupta come from the rural areas of the very densely populated and agrarian state Uttar Pradesh. With more than 190 million people over an area of 243,000 km², Uttar Pradesh ranks among the most densely populated regions on earth. Dr. Gaurav is supported in his work by his parents and his wife with best efforts. This is how he manages the large number of operations. In 2014, he carried out 203 interventions.

Cleft center Ahmedabad / Gujarat (Dr. Shyam Sheth)

Dr. Sheth is a passionate surgeon who treats the children quiet and gentle and who completes his 12 hour day with high self-discipline and personal modesty. On many Sundays he goes to the rural areas of the federal state of Gujarat in order to carry out information events for affected families and to examine local children. For personal reasons he had to reduce the number of operations in 2013/14, but already in 2014/15 he was again able to realize about 180 interventions, in 2015/16 the number was 140.

Cleft center Delhi (Noida) / National Capital Region (Dr. Anshul Shinghal)

Noida Cleft is being run under the direction of Dr. Anshul Singhal, at Kailash hospital, Noida since February, 2012. It is a 350 bedded tertiary service provider with a contemporary care delivery mechanism in place. All the primary as well as secondary cleft and craniofacial deformities are addressed with utmost planning and diligence. Delhi being the capital has the best network in terms of logistics via rail-, road- and air-travel. Despite a tough competition amongst the neighboring age old Cleft projects under various banners, this centre has survived well on the basis of holistic counseling of parents/ ethical practice/ good team work/ satisfactory patient reviews.

Cleft center Visakhapatnam / Andhra Pradesh (Dr. Siva Reddy)

Dr. Reddy is an experienced surgeon and well networked in Vishakhapatnam. Local organizations intensively help him with regards to awareness raising and to find the children. The patients mostly come from rural areas in Visakhapatnam, Vijayanagaram, Ernakulum, East and West Godavari and neighboring mountain areas of the South of Orissa and Chhattisgarh. Since 2012 the center can count on an excellent voice and functional therapist who understands like no other the difficult situation for parents and children from weak economic backgrounds. With 455 operations, the number of operations conducted in the center continues to be higher than the average.

The Projects

Cleft center Hyderabad / Telangana (Dr. Vijay Kumar)

Hyderabad, the city of pearls, is considered as one of the cities providing the best medical and surgical care and patients are seen coming here with hope and anticipation. Dr. A. Vijay Kumar, Director of A.V.R Facial Hospital, is based in the heart of Hyderabad and has been working with us since 2014. His hospital is considered as one of the major centres providing treatment for cleft lip & cleft palate for children and adults alike. His team consists of dedicated doctors, therapists and nurses who strive to provide the best treatment, support and extend their care and concern for the rehabilitation of these patients.

Cleft center Mumbai / Maharashtra (Dr. Nisheet Agni)

Dr. Nisheet Agni restarted the Mumbai Cleft Centre, with the help of ABMSS at Navneet Hi-Tech hospital, Dahisar E from July 2015. It is a Trust hospital which has a state of the art modular operating theatre and a centrally air conditioned ward and caters to hundreds of surgeries every year for needy people. We organize screening camps in association with NGO's in various regions in the interior of Maharashtra. Underprivileged patients with cleft deformities are treated with utmost compassion and empathy not only by the surgeon, but also by the other hospital staff. The centre has a comprehensive cleft team including an Orthodontist, pediatrician and speech therapist.

Cleft center Pune / Maharashtra (Dr. Samrat Sabhlok)

The Pune cleft centre is being run by Dr Samrat Sabhlok and Dr Pushkar Waknis at the Sai Shree Hospital which is a very well equipped hospital. Pune is amongst the biggest districts of Maharashtra with more than 2000 villages under its wings. Dr Samrat has been connected to the German Cleft Children's Aid society since 2010, first as an assistant surgeon at the Bhubaneswar Cleft Centre and now as a Centre Head in the Pune Cleft Centre. Dr Samrat and his team caters to the cleft patients of the rural belt of surrounding districts as well as pune including Ahmednagar, Raigad, Nashik and Satara. Along with having a great team of Surgeons, anesthetist and orthodontist, the centre has an excellent department of speech therapy and audiology.

Cleft center Raipur / Chhattisgarh (Dr. (Mrs.) Nirved Jain)

Chhattisgarh a relatively newly formed state in central India is developing fast having a population of 28 million people of which 80% are living in rural areas and 30% of the total population is tribal. Dr. Nirved Jain is the leading female plastic surgeon in Raipur possessing over 25 years of experience performing a wide range of procedures in the field of plastic surgery. Since our short association from January 2016 we have successfully conducted 10 surgeries in the reporting period. However we are striving hard to reach higher goals with proper organization and team work.

The Projects

Cleft center Mangalore / Karnataka (Dr. Naveen Rao)

Just 3 months back, in February 2016, our most recent centre Mangalore has opened its doors. We are very proud that this centre is already conducting a good number of cleft surgeries. Two cleft camps were held in Kasargod and Kanhangad (Kerala). Dr. Prof. Naveen Rao is one of the most senior cleft surgeons in Mangalore and has been constantly trying to improve the treatment standards in the region. Mangalore as a medical hub is well connected to the surrounding areas. Our center even sees an influx of patients for cleft surgeries from the neighboring states Kerala and Goa as well as from the Eastern and North Eastern parts of Karnataka.

Cleft center Bhubaneswar / Odisha (Dr. Sobhan Mishra)

The Cleft center Bhubaneswar provides medical care to Cleft children in India's second poorest state Odisha. The aid is aimed especially at the native people of India, the "Adivasi" who account for over a fifth of Odisha's 42 million inhabitants. They live in the forests of the mountainous state (up to 1,600m) and many of them have no access to medical care at all. The Cleft center is housed in the Sri Sri Borda Hospital in the capital Bhubaneswar. In the reporting year, Dr. Mishra performed 232 operations.

Cleft center Srinagar / Kashmir (Dr. Mohammad Shakeel)

Dr. Shakeel has been able to accommodate the center in a very well-equipped hospital, the "New City Hospital Bemina". Especially for the Cleft operations there is an operating room and an infirmary for the young patients. The cooperation between surgeon, orthodontist, speech therapist and pediatrician is outstanding. The whole team is working with great love and expertise for the good of the children. Dr. Shakeel also treats children coming from the rural regions of Kashmir which are difficult to access. Since the number of interventions also depends on the security situation in Kashmir it amounted to 55 in 2015/16.

Cleft center Raigarh / Chhattisgarh (JSPL Foundation)

In association with the Jindal Steel and Power Limited Foundation we provided free cleft lip and palate surgeries at the OP Jindal Fortis Hospital in Raigarh. The patients from the surrounding areas of Chhattisgarh were benefitted by this project.

Events in 2015 - 16

Mysore Warriors – Thanks for your Donation

The Mysuru Warriors, also called as MW, is a Mysuru based Franchise of the Karnataka Premier League (KPL). The team powered by Cycle Pure Agarbathies donated one lakh rupees to ABMSS under their CSR activities.

Mysuru Warriors as a team embodies the excitement & attitude that is unique to Mysore, the Cultural & Heritage Capital of Karnataka State. The sole purpose of the team is to excite cricket enthusiasts across the region, encourage & inspire the younger generation who wish to succeed in sports. The values of the team resonates Spirit of Mysore, which is the hunger to succeed irrespective of the challenges in their way. The ideals of the team are enthusiasm, courage, imagination & the urge to be successful. This is very similar to the values and motivation of ABMSS.

Mysuru Warriors to bring a smile to cleft lip and palate children

Mysuru Warriors donate Rs. 1 lakh for the corrective surgery of seven children with cleft lip and palate in Mysuru on Tuesday. - PHOTO: M.A. SRIRAM

Laiqah A. Khan

MYSURU: Mysuru Warriors, the Karnataka Premier League (KPL) team owned by Mysuru-based NR Group, contributed Rs. 1 lakh towards providing treatment to children with cleft lip and palate.

The contribution was made to Deutsche Cleft Kinderhilfe, an international non-governmental organisation that offers comprehensive treatment to children with cleft lip and palate across Mysuru, on Tuesday.

"The funds will help Deutsche Cleft Kinderhilfe to ensure corrective surgery for seven cleft lip and palate affected children in the city," said a statement issued by the Mysuru Warriors. Arjun Ranga and Pavan Ranga, co-owners of Mysuru Warriors, presented the contribution to Mr. Dushyant, Regional Head, Deutsche Cleft Kinderhilfe.

Identifying cleft lip among one of the most neglected conditions, the Mysuru Warriors, in a statement, said the deformity causes tremendous emotional suffering calling for immediate attention and action.

Fellowship Program

Dr. Laiphrakpam Girindra Singh (Coorg)

Dr. Laiphrakpam Girindra Singh has started his fellowship on the 03. Juli 2015 at Cleft Center Coorg. There he works and learns under the guidance of one of our most experienced surgeons, Dr. Jayanth B.S. He has assisted 68 surgeries and performed individually 2 surgeries. Furthermore, he has gained good exposure to diagnose, work up, and treatment plan of all Cleft deformities.

Dr. C. Charan Kumar Reddy (Vishakapatnam)

Dr. C Charan Kumar Reddy ist a fellow at Durga Hospital, our Cleft Centre in Vishakapatnam since 01. September 2015. He assists Prof. Dr. Sivanagendra Reddy in all areas of cleft care and has already taken part in more than 100 surgeries. His tasks comprise the admission of the patients, the diagnosis of the cleft defect, surgery preparation, postoperative care, counseling parents for further follow up and suture removal, photodocumentation and datamanagement.

Dr. Anushree N. (Mysore)

Dr. Anushree has joined for a fellowship with ABMSS on 1st of July 2015. Her tasks comprise the admission the patients, the diagnosis of the cleft defect, surgery preparation, postoperative care , counseling parents for further follow up and suture removal and coordination with the specialists from the disciplines speech therapy, orthodontics and ENT. In addition to her work at St. Joseph's Hospital in Mysore, she organizes cleft awareness camps in close cooperation with schools in rural areas, creating awareness about cleft and the free treatment services of ABMSS.

Dr. Kamran Khan (Hyderabad)

Dr. Kamran Khan has joined A.V.R Facial Hospital, Hyderabad, on 1st February 2016. Since he has joined, he is actively participating in all activities regarding clefts and maxillofacial surgeries. Initially he observed a couple of cleft cases and then has assisted in about 80 cases till date. The work that he is doing comprises admission of patients, pre-operative and intraoperative photographs and record maintenance, patient care and assistance in the operation theatre. Recently, he has started doing suturing for cleft lip.

We acknowledge the support of Wolfgang Müller-Osten Stiftung for the fellowship program.

Cooperation with Kosmoderma Clinics

In February 2016, a fantastic opportunity emerged that is going to enable ABMSS to even further extend our services: Kosmoderma Clinics has joined as a partner and offers cosmetic treatments such as state-of-the-art lip fillers and laser interventions free of cost. But shouldn't charity tackle the basic problems only? The reason why we are convinced such treatments are as essential is that we believe that every child has the right to a dignified life. Especially in India, family ties build the fundament of societal living together and this includes getting a good job and - of course - marriage. Therefore, we are very glad to help our patients with an improved look which helps them reintegrate into mainstream society. This enables them to lead a completely normal and independent life.

Chytra V Anand
Founder and CEO
Kosmoderma Clinics

Ms. Bharani received a free laser treatment comprising 6 sessions from Kosmoderma.

One of the first persons to be supported under the roof of this partnership is Ms Bharani from Vijayawada, Andhra Pradesh. Ms Bharani has undergone two cleft surgeries when she was a baby. Although being a very successful Engineering student today, she claims to be still treated differently because of the scar in her lip. In order to improve this situation and with it her self-esteem, Bharani has received a free laser treatment by Kosmoderma Clinics. We hope that this cooperation will continue as successful as it has started and that many more of our patients can benefit from it.

Why I am happy to be associated with ABMSS

MY TESTIMONIAL:

"No one knows how many lives will never be lives. How many children will never eat or speak properly. Never go to school or hold a job. How many boys and girls will go through their entire life without ever beginning to smile?"

The greatest tragedy is that all these children are suffering not because they were born with a cleft, but because they are poor, too poor to pay for a cleft surgery that has been around for decades. The goal of the work being done by ABMSS is to recreate smiles among these children, spread happiness to families and trigger confidence in these children to face the world with a positive attitude towards life."

Dr. A. Vijay Kumar

ABMSS Cleft Surgeon

Director of A.V.R Facial Hospital Hyderabad

A Big Success – The 100 Smile Drive

Fundraising has taken place in India only for last year. Although we are very new on the field of acquiring money in the country itself, our first campaign that was launched during Diwali time became a success. With the dedicated actions of voluntary supporters the numbers of surgeries raised during even excelled our target of 100. In the end we could count the funds to make 114 children smile. Special Thanks goes to Dr. Ashish Shetty, Board Member and excellent advocate of the cause who managed to convince a large number of people to make a contribution. Another important supporter who decisively contributed to the success of the campaign is Mrs Ramya Lokesh. Special thanks also to Prashant Miranda who backed up the Drive with his wonderful illustrations and graphics.
