

QUARTERLY PROGRESS REPORT

Reporting Period- Jul- Sep ' 2020

Preparing the pitch

As we stepped back into the known territories but it was a completely unknown turf with uncertainty, fear and lack of opportunities more than ever before. Communities which are already cramped and struggle for space to put the feet on ground or to look up to the blue, play space has always been a dream. But dreams does come true and as they say "when the going gets tough, the though gets going".

- With help of parents, local civic stakeholders and majorly our players taking the lead we have carved out two playing spaces in each of the communities which will enable the kids to have access to sports practice within 2 km radius
- At Aya nagar community, the field has fixed Kho Kho poles installed and its a standard full size Kho Kho pitch
- At Sangam Vihar, a 6v6 football game size pitch is created along with a jumping pit for long & high jump
- Adjoining walls were painted with football themes & a weekly maintenance group was also created

From preparing grounds to juming pits and also portable goal posts, kids did it all

Back to the pitch

Since the Unlock phase begun, we have changed our logistical arrangement so that kids don't need to step out of their immediate surrounding or take any form of transport to reach the play area. The **community play space is within 15-20 mins walk for 80% of the players**. Conducting sessions within community was a great first hand proof of our work which lead to existing kids parents to turn up to watch the sessions & also their neighbors turned up to enroll their kids

- 99 sports sessions were conducted spanning a cumulative 315 hours across both the communities
- Pre & Post Session sanitization protocol such as sanitizing equipment, temperature & SPO2 checks, arrangement of masks and sanitizers have been followed. Initially started with smaller groups of 6-8 & later moved to groups of 13-16
- Average attendance of 78% across both communities were recorded considering both Sangam Vihar & Aya Nagar
- One of the most encouraging instance a spike in enrollments especially in Snagam Vihar which witnessed 49 new children joining our program taking the total count very close to 100 & now we are on course to have structured pathway of teams from U7 -U17
- At Aya Nagar also 10 new kids joined our program. Hence, cumulatively across both communities total children in our program increased to 135 from 76 and only 7 players dropped out in this phase

Sesions are happening all days in the week involving 9 batches across age-gender groups

Performing on the pitch...

- Practice without platform to perform is half the job done. Since, tournaments or leagues were shut we decided to conduct our **Gully- Mohalla league in a 1 v 1 format** which started from July end & continuing
- Total **51 children are participating in two cluster based groups** where they are playing in a 1 v 1 matches in a round robin league format every alternate weekend enabling them some basic game time
- To celebrate the new pitch, a 2 day tournament was organized with players of Sangam Vihar. There were four teams in a 6 v 6 format. The winners trophy was colored roots unearthed from the ground while cleaning
- Our U13 Girls football team started competitive matches with 4 friendly matches against U13 Chankyapuri Boys
- Although this season match opportunities will be a challenge but **we are hopeful to play at-least 1500 match minutes** till Mar'2021 vis-a-vis 2400 mins standardized targets for U13 age group & beyond

Players in action during Mohalla League & friendly matches

Its everyone's game...

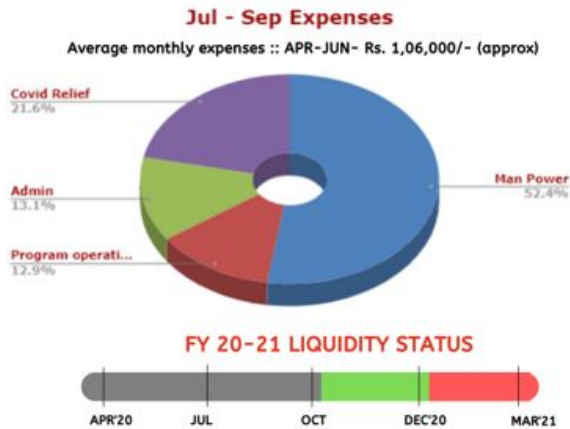

A crisis is an indicator for mankind to be aware & come together stronger as a tribe. At KKM, it's always been evolving as a community and parents were as critical as children in our program. As a part of our long term strategy of sustainable communities we recently facilitated the formation of Community council at Sangam Vihar

- The idea was shared & well received in the first ever in person parent meeting post lockdown. Parents suggested to follow election process to choose the council members.
- The council is a 6 member team comprising of 3 parents (gender diversity is must), 2 players & 1 representation from KKM staff. Total 6 parents & 9 players put forth their nomination & 110+ players & parents voted to elect the members
- The first ever community council has started working and their tenure is till march'2021. To start with they are focusing on conducting small group parent meets on their own especially with the parents of newly enrolled kids
- On a different note, senior players has shouldered three key responsibilities as small groups of 3-5. Health check through home visits & vitals check to be monitored by Health group, Progress tracking & match analysis to be owned by Data group and community outreach group to work on hygiene awareness as well as ground maintenance

FINANCES & SUPPORTERS

FOOTBALL RETURNS CAMPAIGN is an initiative started by Ms Sanchita pant, a 11th grader sportsperson who as a sailor represented India . Being an athlete herself , she realized the struggle of aspiring athletes in this scenario & reaching out to her friends & families to raise equipment & gently used / new kits for KKM players. We are deeply grateful & excited as this initiative already helped our kids with equipments' worth more than fifteen thousand which enabled them to start training with ease & joy!

Q3 PLAN

Continue working on strengthening the roots of our program, **HEALTH, EXCELEENCE & SUSTAINABILITY**

With situation improving, we will **explore greater opportunities** for our kids to bridge the gap happened

Continue **reaching out to the community** through hygiene awareness drive

Continue **coming together as community** to strengthen the culture of sports
