Message from the Executive Director

It is my pleasure to present to you NYDHEE's Annual Report 2018. NYDHEE's commitment to reduce poverty among small holders and empowering women and girls from marginalised communities provides the thrust for undertaking diverse development initiatives and working towards impact at scale.

In 2018-19, NYDHEE through its various intervention directly reached more than 30,000 people in 3 states towards Sustainable livelihoods, WASH, Climate action, health, education, and participatory community development initiatives.

NYDHEE's work around reducing poverty, improving access to safe drinking water, addressing climate concerns, health and education are aligned with 8 goals out of the 17 SDG goals. We have been working with diverse stakeholders, which include the Scheduled Tribes, Scheduled Castes, the landless, marginal and small farmers, the poor women, and the children by leaving no one behind. It is also aligned with the core objective of the Sustainable Development Goals (SDGs).

This year, NYDHEE's impact footprint grew, both geographically and sectorally. As a result of working closely with the like minded people, donors and department/agencies of the state government, we have able to scale up our successful interventions. Supported by the Heifer International, the MSED Team continued their work on providing sustainable livelihoods to 5000 small holder farmers in Mayurbhanj district. NYDHEE's livelihood programme has been scaled-up to additional 1000 families in Mayurbhanj through our innovative micro-credit programme. In Jharkhand and West Bengal, our team have been engaged in ensuring safe drinking water to 1000 marginalised families through Biosand filter project and we continued to engage with more families. With support from NABARD, we were able to strengthen our SHG members in micro enterprise development and leadership skills. There are many small but important programmes implemented by NYDHEE in different thematic areas.

With the immense support and ownership from the local community along with fund support from our donors, government and non government organizations, we have continued to implement solution driven programmes to bring positives changes in the lives of the most vulnerable communities in Odisha and neighbouring states; thank you for trusting us. We express our earnest thankfulness to all well-wishers, supporters and resource providers for their continuing support and guidance during this year. Last, but not the least, I would like to acknowledge and thank the Board Members for their continued support and guidance for NYDHEE to be effective in its endeavours.

Prasant Muduli

NYDHEE

In the year 2000, few committed youth volunteers decided to streamline their efforts devoted for under-privileged section of the society; and then, Network for Youth Development & Healthy Environment (NYDHEE) was established on the eve of National Youth Day. Registered in 2001, NYDHEE is a non-profit organization, has been working with the agenda of empowering lives facilitating an institutional process for sustainable development.

NYDHEE believes that appropriate and multi-lateral development in the society could be established through community participation, especially women & youth. With adequate facilitation, local youth can be the best managers of the local resources and possess the time tested knowledge for its sustainable use with ecological approach.

VISION

A society where the people believe in participation strengthening the process of democratic governance

MISSION

Facilitating community institutions leading the process of sustainable development for uniform economy with environment friendly approach

CORE VALUES

- Transparency
- Financial integrity
- Gender equity
- Community centered bottom up approach

TARGET GROUPS

- Marginalized, socially & geographically excluded
 - Women & children especially at risk
 - Marginal small farmers
- Forest dwellers & forest dependent communities
- Youth in need (provide appropriate guidance for social development)

OUTREACH

3 States (Odisha, Jharkhand and West Bengal)
8 Districts
12 Blocks
28 Gram Panchayats
8000 Households
128 Villages
30 Thousand Populations

Empowering marginalised for development at Last Mile

Creating sustainable livelihoods:

Our Livelihood programme centred around women SHG members, small and marginal farmers, livestock based entrepreneurs belonging to poor and marginal communities. The livelihood strategy of NYDHEE focuses on facilitating beneficiaries on five elements (Increased income and assets, Food and nutrition security,

Environment, Women's empowerment, Social capital) to achieve a sustainable livelihood. This is achieved through empowering the people by increasing their knowledge base and capacitating them through skill building and facilitating access to resources. The approach has been to promote and strengthen Peoples' Institutions, undertake Micro-level Planning by involving those institutions, providing necessary physical inputs and convergence with mainstream development programmes for sustaining the initiatives. Helping women from marginalised to earn their livelihoods using a verity of Agriculture and non-agriculture avenues is one of the core mandates of our livelihood interventions, which is directly aligned with SDG 8

During the year 2018-19, under livelihood initiatives, NYDHEE reached out to 5010 households/families covering 79 villages of 9 GPs in Bangriposi block of Mayurbhanj district through Mayurbhanj Socio economic development project (MSED) with support from Heifer International (India). Total of 20,706 populations covered through this intervention.

Action on ground

During the reporting period, we supported women smallholders and landless workers in Bangriposi block of Mayurbhanj district to enhance their skills and explore alternative income generation activities for their lead role in livelihood activities. Therefore, community based institutions like Self-help groups, Farmer producer organization were promoted and capacitated at the micro watershed level. These activities help enabling and empowering the CBOs to engage in programme implementation.

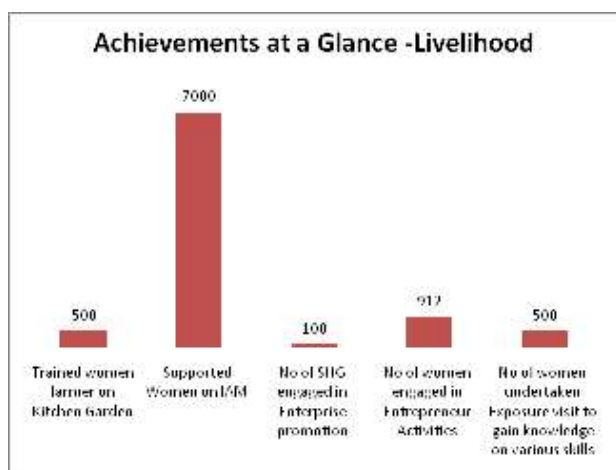

- o Trained 500 women farmers multi-seasonal kitchen gardens for diversifying their family nutrition diets

- o Supported 7000 women in bangriposi block in improved animal management to improve yield and income

- o Engaged 100 SHG groups for enterprise promotion at community level and as a result, 912 women entrepreneurs were gainfully engaged in community goat farming, Backyard poultry, mushroom cultivation, NTFP trading, manufacturing FMCG products and incense stick making during the reporting year.
- o Observed Nutrition day at community level create awareness on importance of nutrient foods for leading a healthy life.
- o Supported 500 women for starting agriculture and Livestock based enterprises through passing on gift model.
- o Capacitated members of FPO on leadership development, Marketing skills, FPO management through exposure visits and various trainings

Capacity Building:

Capacity building of the Community level institutions/SHGs has been an important aspect of NYDHEE's intervention. These activities help enabling and empowering these groups to engage in project implementation. Training on different aspects such as, fund management and accounts, record keeping, group dynamics, organization management, leadership, enterprise promotion, business development plan etc were provided to the members of the CLOs.

With support from NABARD, NYDHEE had organised two days of Grass Root Level Training Programs (GRLTPs) for SHG members Bangriposi and Bisoi block of Mayurbhanj district. The women SHG members were provided training on group dynamics, record keeping, SHG bank linkage etc. 160 women SHG members received these Grass root level training programs that organised on 26th and 27th February 2019.

Micro Enterprise development program:

Under the Micro enterprise development programme, A 13 days skill training on food processing and quality preparation of various pickles, papad, and badi was organised at community hall of Manada village in Bangirposi block. The training was imparted to 30 SHG members from Nischinta, Bangirposi, Bankati and Dighi panchayats for 13 days (3rd February-15th February 2019).

Following series of training in SHG management, enterprise promotion and value addition of products, the SHGs now stand equipped in required skills for managing the SHG effectively and value addition of produces at village level.

Combating climate change:

Climate change coupled with large scale deforestation has impaired the green cover significantly. The present day situation demands reducing vulnerability of communities and building their resilience to ecological changes through adaptation and mitigation measures. NYDHEE believes in providing the socially excluded groups with sustainable income earning opportunities through preservation, management and recharge of the natural resource base. Some of the measures include protection and regeneration of forest through planting of saplings and seed dibbling, promotion of alternative livelihoods, increasing the tree cover by horticulture plantations in uplands, FRA land and cultivable waste lands, land water management through promotion of community farming, kitchen gardening, etc.

Agro-forestry being an important part of the program, efforts were made to include the school children and community members in this activity. As a result, 90 hectares of land has been brought under Agro-forestry in Mayurbhanj district. Also, people in 51 villages pledged to protect/regenerate 922 hectares of forest area. Gap plantation in 261.56 hectares covering 26 villages was also taken up during the year in convergence with forest department. Species like Sisu, Akasia, Karanja, Sanchakunda, Bambo, Amala and Bela, Teak, Tamarind, Jackfruit and Jafra were taken up for the gap plantation. Like previous years, NYDHEE has also carried out children centric environment conservation programme "One child One Plant campaign" in Bangriposi block of Mayurbhanj district.

Sustainable Agriculture:

Agriculture being one of the primary sources of livelihood of the tribals, efforts were made towards improving the agricultural practices resulting in increased productivity and ensuring year-round food security and enhanced income. Improved practices such as use of organic manures and pest management practices, improved variety of seeds, mixed cropping, crop rotation, community farming, kitchen gardening etc. were being promoted. During the year, 897 farmers / producers from 79 villages of Mayurbhanj district were involved in sustainable agriculture practices. As a result nearly 184 ha land was cultivated for paddy, Ragi /

finger milts, maize, potato, onion and other mixed vegetables. This also led to increment in production by 3 to 4 quintal / Acre due to use of good quality seeds, introduction of new technology and method of cultivation. About 250 acres of land were covered under pumpkin cultivation. Total 178 families were involved and benefitted from pumpkin cultivation i.e. around Rs. 15000/- per acre. Also, 120 women from 10 SHGs got involved in community farming wherein 98 acres of land was covered with maize and vegetable.

Employment Generation:

NYDHEE is continuously working for the economic empowerment of disadvantage communities especially for women through various projects and innovative approach. NYDHEE is providing vocational training for low-literate tribal girls in sewing, cutting & tailoring so they can earn a dependable livelihood and finally break the cycle of poverty. It is one of the most effective programs for the upliftment of women, according them the ability to chart their own destinies.

- Through this self initiated programme, during the year 2018-19, 30 girls have opened their in-home tailoring services and earn up to Rs 4000 in a month
- 12 girls are employed in garment industries and earn extra income for their family
- NYDHEE is in process of opening village level vocational centres which will be managed by local Self-help groups

Community farming:

The alternative livelihoods options as envisaged in the program are to provide the women SHG members with additional income so that their dependence on forest is reduced. Since non-timber forest produce provides income earning opportunity for a limited period in a year, the cultivation of vegetables in the community farming approach helps in maintaining the flow of income throughout the year. As a result of this planning exercise, kharif vegetables were taken up by 654 women SHG members covering 385 acres from 69 villages. Nine women farmer also cultivated pulses in 5 hectares of land during the Rabi season. Apart from this, 25 vermi compost pits were demonstrated in 12 villages in collaboration with Horticulture Department.

Enterprise promotion:

Entrepreneurship is also one of the core areas being promoted by NYDHEE to enhance the income of the people. NTFPs well as non-farm based enterprises are taken up by the community members. Non-farm based enterprise including goatery, poultry, duckery, vegetable vending, etc. were promoted. In order to make producers realise the commercial value of their produce, NYDHEE is developing a comprehensive system of collective marketing at the village level which helped improving the participation of marginalized in the marketing effort like aggregate to achieve scale, participate in value addition and engage with markets as an equal participant. During the year, 165 groups participated in collective marketing in 80 villages.

Fostering sustainable development through microfinance initiatives:

In order to lift these marginalised women from the state of poverty and provide them a dignified life, NYDHEE has started micro-credit program in selected blocks of Mayurbhanj district. At present, we are only providing small loans for developing farm and livestock based enterprises as about 85-90% of households rely on agriculture and allied activities for at least part of their income. Our financial services are specially designed for different farming groups to provide them greater returns from their harvest/produce and guard against exploitation from informal money lenders. Complementing this, we build financial literacy, provide market linkage, build their capacity to adopt modern technology and arrange various support services for their enterprises through other bridge programs.

- Our microfinance clients are predominantly poor rural women, 99% of the clients we serve are women
- Reaching more than 90 villages in Bangripasi and its surrounding area
- About 1000 active borrowers are associated with NYDHEE
- More than 200 joint livelihood groups have been formed to govern and manage these microfinance activities
- 55 nos of capacity building(essential agriculture, livestock management and financial literacy) training has been organised for the clients
- NYDHEE organise animal health camps and periodic immunization in their locality through its volunteers.

Within the very short period of intervention, NYDHEE has able to develop sustainable financial products for rural women that ensure longevity and scale. These women are now equipped to take control of their life and NYDHEE is committed to reach more people in near future.

Promoting Water Sanitation, Health and Hygienic Practices

NYDHEE, during the year, continued its WASH interventions in both Jharkhand and West Bengal with the support of Native Energy. The intervention has helped people to improve their living standard by promoting clean drinking water, socio-economic and health impacts through long-term, sustainable solutions. So far, in the first phase of the project, 1000 Biosand filters have been installed in low income families of both states.

The Biosand filters that we provide through this project are safe and effective household water filter that will operate for 10 years or longer. It uses slow sand technology to remove up to 99% of waterborne pathogens.

With safe drinking water, communities reduce time absent from school or work due to illness and save money on medical expenses. This project presents a new solution to the challenges of extreme poverty, poor health, and the increasing carbon dioxide emissions associated with burning wood to boil water for drinking.

Improving Health and nutritional status of mother and child:

NYDHEE has been working on improving nutrition outcome in 8 remotely located GPs of Mayurbhanj district. Our nutrition mission for mother and child is supported by Vitamin angels and network of Anganwadi workers, ASHA, ANM and other health workers. Under this programme, we have conducted health camps and door to door visit for distributing micronutrients, especially vitamin A, albendazole and multivitamins among at-risk population. We also conduct awareness meetings at regular interval to sensitize the people on various nutrition and health related issues through our trained volunteers.

During the year 2018 210 number of infants (6-11 months) 359 children (12-59 months) have received vitamin A supplements and 328 numbers of children (12-59 months) received Albendazole (syrup for deworming). 8 health awareness camps were organised in 10 villages and 98 nos pregnant women received multivitamins.

Promoting Oral health and hygiene among the vulnerable community:

With an aim to provide high end dental health care to the needy and underprivileged for free, a two day dental check up and awareness camp (3rd and 4th June 2018) at Brahmanigoan village under Brahmanigoan GP and Anlagunja Saraswati Vidhyamandir School under Syamsunderpur GP of Bangiriposi Block. A total 108 Females and 68 male's patients received oral health services by Senior Specialist Dental Surgeons and para-medical staffs from Bhubaneswar. During this occasion, awareness session was organised and participants got ample opportunities to interact with the doctors gained knowledge concerning oral diseases.

(Community development initiatives)

Partnering with GOONJ, We have undertaken several community infrastructure development projects in Bangiriposi block of Mayurbhanj district during the year 2018-19.

Cloth for work programme:

- Boundary wall of School and Anganwadi centers have been repaired in chorabandh village
- 2 community halls were constructed at Brahmanigoan and silpunji villages and all the materials were provided by villagers
- 100 mtrs road to worship place in Chandbil village have been renovated
- One Anganwadi building has been constructed in Poonasia village, now 22 children are enrolled to the centre
- 12 numbers of Goat- sheds have been constructed for poor families

Facilitation of Social Audit

Department of Panchayati Raj, Odisha supported NYDHEE to facilitate social audit of various welfare schemes meant for poor community in Balipatna and Tangi Block of Khuda district. With the help of district

officials and other stakeholders, a qualified team from NYDHEE ensured smooth implementation of social audits at different location. Along with implementation, the team helped them in addressing the issues emerged from the social audits.

Observation of special days

International Yoga Day 2018

On 21st June 2018, NYDHEE observed International Yoga Day at Sanapatharkam village of Nischinta GP to raise awareness among villagers about the benefits of Yoga in daily life. Participating in the event, Yoga trainer Mr Ajit Kumar Sethi urged people to practice it regularly to bring together physical, mental disciplines to achieve a peaceful body and mind. He said that Yoga is a form of exercise performed through diet, breathing and physical posture. Around 35 villagers (Both men and women) had participated in this event. The theme of International Yoga Day 2018 was "Yoga for Peace".

National Nutrition Day

National Nutrition Day was organised at the Gosanipal village of Bankati GP on 5th September 2018 to spread awareness and encourage the people to understand the importance of nutrition and adopt a healthy, sustainable lifestyle. Sharing the importance of this day, several participants including District officials of ICDS and Anganwadi workers appreciated the effort of NYDHEE for its continuous engagement with the poor rural community to overcome the challenge of malnutrition, anaemia especially among children, pregnant and lactating mothers. Several activities like preparing nutritious food, exhibitions, posters preparation were conducted to help children learn about healthy eating while having fun at the same time.

World Breastfeeding Day:

With support of Anganwadi worker and community health workers, NYDHEE had observed World Breastfeeding day at Kaddiha village of Shyamsundar grampanchayat on 5th August 2018. An interactive session with mothers and a "Padyatra" was organised to encourage breastfeeding and improve the health of mothers and babies.

Celebration of International women's Day

NYDHEE celebrated International Women's Day on 8th March to recognize women's social, political, and cultural achievements from the past and present. More than 200 women from nearby villages including women PRI members gathered at Nedakudar village for celebrating women's power. Several dignitaries and government officials participated in the celebration and inspired women for their socio-economic empowerment. Women also played "HOLI" with each other and participated in the cultural event.

Global HandWashing Day:

On 15th October, with the help of school management, NYDHEE organised an interactive session at Haradagila High School at Darkantia village in which more than 250 students participated. Added to this all teachers, staffs of NYDHEE and health workers also took part in this celebration. On this occasion, Project coordinator of NYDHEE demonstrated the process of proper hand washing to the children and shared the health benefit of hand washing before and after eating. In the end, a general knowledge competition was also organised among the school children and refreshments was served to all participants.

World Environment Day:

NYDHEE observed "World environment day" by conducting an awareness meeting at Nischinta village on 7th June 2018. SHG members, school children and PRI members participated the meeting and discussed about the harmful effect of environmental degradation and importance of conserving nature.

Development at last mile-Stories of changes

Stories of Change-1

(Passing on the Gift- An Idea for Value Based Community Development)

Passing on the Gift (POG) is a hallmark approach under Heifer supported MSED project. Initially, the concept mandated that each farming family who received an animal gift passed on the first female offspring to another in need. But with passing years, the community themselves owned the process and passed on other resources or knowledge as well.

Adivasi community is known for their communitarian lifestyle, when we introduced the POG concept among them, they not only accepted it but also blossomed the idea and achieved success far more than our expectation. Now, Passing on Gift has become a ritual and part of their rich socio-cultural practices.

Passing on gift has many longstanding impact on the community like, it creates strong social bonding, promotes caring and sharing attitude among the targeted beneficiaries and above all, the act transforms recipients into donors and produces a profound sense of accomplishment.

During the reporting year, our direct beneficiaries under MSED project have passed on 535 goats, 223 poultry and vegetable seeds (112 families) to needy families. To recognise their generous act, NYDHEE organise "passing on ceremony" every year and felicitate the donors.

This year, the 4th Goat pass on ceremony was organised at Saraswati High School Anlagunja, Syamsundarpur, Bangriposi on 4th of June 2018. More than 300 community members had participated the ceremony along with guests, Mr. Prasant Muduli (Secretary cum Executive Director), Mr. Smurti Ranjan Pattnaik (DDM -NABARD), Mr. Chitaranjan Naik (Sarapanch of Syamsundarpur GP), Mr. Laxman Marandi (Sarapanch of Budhikhamari GP) and Dr. Milan Kumar (Dental). On this occasion, 102 numbers of goats were passed on as gifts by SHGs members to other SHGs members who do not possess any goat and belong to very poor and marginalized family.

This POG practice is very effective, at minimum, doubles the impact of the original gift, transforming a once impoverished family into full participants who improve and strengthen the bonds within their communities.

Story of Change-2

(Working together for achieving Self-reliance)

Case study of jai jagannath SHG: Economic women empowerment through rolling of Agarbattis

Village Badapathar kham is situated about 5 kilometres from Bangriposi block headquarter. There are 105 families living in the village, mainly from tribal community and few households belong to general category. Males of these families work as labourers (agriculture and other areas), while the females are responsible for household jobs. The primary sources of income of the residents of Badapathar kham are agriculture, animal husbandry, poultry and goatry. In the year 2015, 12 SHGs were formed in that village through ICDS scheme; Jai Jagannath SHG was one of them.

Jai Jagannath SHG was formed by 12 women and all of them belong to tribal community. In initial years, they were only engaged with group savings and internal loaning activities. Due to lack of proper guidance and trainings, they could not start any income generation activities even though they wished to do so.

Three years ago, NYDHEE began working in Bangriposi block with support of Hifer International and selected "Jai Jagannath SHG" under MSED project for helping these women to become economically self-reliant. Through the MSED project, NYDHEE facilitated the SHG members, getting not only skill trainings, but guidance and vision. As majority of the group members are illiterate, they were not able to approach proper institutions for trainings, loans or purchase of raw materials etc. However, after getting support from NYDHEE and Hifer International, they are now able to overcome all the challenges that they had faced before and also setting examples for other SHGs in their locality. Jai Jagannath SHG

have revolutionised their village by working together under leadership of Ms Laxmirani Nayak (Secretary) and creating a secure, community-based economy through various sustainable income generation activities.

Group secretary Laxmirani says that "Before linked to MSED project, the families of SHG members were only dependant on rice cultivation for their livelihood which was quite insufficient to live a comfortable life. Now we are growing variety of vegetables, corns, fruits, mushrooms which provide us adequate nutrition as well as extra income to the family. Along with cultivation, most recently we have started manufacturing incense sticks as a group level activity. The club of profitable income generation activities and working together as a group has resulted in an improved economic status of the members.

The idea of setting up an agarbatti (incense stick) manufacturing base at their village came up after realising the fact that half of the group members are more than 50 years and not able to do laborious cultivation work. The initiative also aimed at providing sustainable livelihoods to senior group members along with some extra income to other members. Agarbattis are generally made manually but the SHG members decided to deploy machines in the village to make the process more efficient.

The process started with the training of group members, arrangement of finance, identification of a suitable place to work and survey of market potential. Jai Jagannath SHG took a of INR 1 lakh to start the project and in May 2019, one fully electric operated machine was installed. Before the installation, group members had undergone through required training. After training, 3 women from the group were chosen to operate the machines and other women were engaged in packing and marketing on the basis of their efficiency, need and various operational criteria.

Now, all 12 members of the SHG are engaged in this livelihood activity, producing nearly 300 Kilograms of agarbatti per month, which are marketed through Saraskana and Dwarasuni FPOs. Each women member spends about 4 hours on a day in agarbatti making and earns around INR 150. The SHG is very new to the agarbatti making; NYDHEE is providing expert guidance in taking decisions related to the purchase of raw material, supply of agarbatti to vendors, payment systems, expansion of business, etc. They are planning to purchase another machine in the coming month and after that the production expected to increase by 10 times.

All SHG members feel proud to be associated with Jai Jagannath SHG. They say that with the support of NYDHEE and Hifer, we are now feeling financially secure which was not there before. "Life as a dependant on other family members hardly exists any more, we also substantially contributing to the family income. We are now getting more respect in the family. We were illiterate and we paid huge price for it, we want our sons and daughters to be educated and work in services," says one member. They now believe this future could be possible. They have become stronger both socially as well as economically. As a result of the growth of these women other women SHGs have also been motivated to start such enterprises.

Story of Change-3

(Solving food insecurity and enhancing Income)

Binapani Mahanta, aged 55 years, lives in Mangarh Mundakatta Village in Mayurbhanj District, Odisha, with her husband Mukunda Mahanta, two sons, son-in-laws and a grandchild. The only livelihood source for her family was meagre income from two acres of ancestors land and was facing poverty. Her husband is bedridden for last 15 years due to chronic illness. The meagre income of around Rs.2500 from sale of seasonal agriculture products had been not even sufficient for single square meals a day for the six and were unable to spent on her husband's treatments.

In 2009, Binapani, became a member of "Jai Maa Durga" SHG involved in thrift savings and also tried to supplement her family's income by involving in IGP activities. Due limited resources and knowledge, she was failed in some initial attempts but she continued to be associated with the

SHG group. In 2015, when NYDHEE started implementing MSED project in their locality, she received several trainings and handholding support for improving her livelihood condition. The trainings and support from NYDHEE brought best out of her; she started kitchen gardening in her backyard agriculture land and involved in vegetable business. The steady flow of income from the sale of various vegetables enables Binapani to manage her family needs and also able to provide much needed medical assistance to her husband.

Since 15 years, after her husband became ill, they had been struggled to live a dignified life and victim of extreme poverty. Lack of knowledge and resources had made them more handicapped. Moreover, the economic condition was so bad that they were not able provide proper education to their children.

Hence, she utilized the opportunities provided by NYDHEE and took loans from her SHG to start kitchen garden. The trainings provided by NYDHEE and regular involvement in groups made her confident to take up the initiative which later changed the demography of her family.

Now Binapani earns about Rs.9000 per month by selling vegetables from the kitchen garden and able to bear the medical expenses of her husband which comes around Rs 1900 per month. She also spends around three thousand rupees in a month for her grandchild's education. Binapani who lives a much better life than before, planning to acquire some more lands for developing kitchen garden.

"Everybody deserve opportunity to grow and prosper and when I got opportunity through NYDHEE, I grabbed in both hands and result is in front of you"- Binapani Mahanta.

Story of Change-4

(Bio-sand filter- The saviour to my Family)

Murti Devi, a resident of Palandu village in Ranchi, Jharkhand, used to spend a large chunk of her family income in medical expenses. As there is no other source of drinking water in her village, she collects drinking water from the community borewell which contains harmful minerals and arsenic.

Murti Devi lives with her two children and five other family members. It is the duty of Murti to collect drinking water like other women in her community. Four years ago, she received Bio-Sand filter from Native Energy with the serial No-10002641. Before that she normally filters the collected drinking water by using clean clothes still some red and brown particles were clearly visible. They knew that the water is not good for their health but in the absence of any other source, they could not do much. The impact of the contaminated water was huge on her family especially her young children were regularly affected by diarrhea, cholera, fever, vomiting, ear infections, rash, flu and malaria. Their schooling was also affected as these children regularly fall sick.

Murti and other adult members of her family work on wages with limited earning. In addition to that when the children get sick, she could not go for work and medical related expenses creates extra burden on them. Thus unsafe drinking water affected her family very badly in a multiple way.

It has been four years, her life started to change when she received a Bio-sand filter from Native Energy. Initially she was not quite sure about the performance of the filter and its impact on her family health. After using it for some days and months, she started to notice the change in her children. The frequency of illness due to diarrhea, cholera, fever etc is less in comparison to previous years. Their visit to hospitals and health related expenditure has decreased significantly. They are now living a much better life than before. Now, she also collects water from the same community borewell but the water treatment technique has been changed. She regularly attends awareness meetings on Bio-sand filter and has good knowledge on its maintenance.

Murti says that the water come out of filter is very clear, with no-smell and tasty. Everybody in her family loves to drink it and children usually carry this water to their school in their water bottle. According to her, the filter is very cost effective. She also suggests that those are using these bio-sand filters must keep it clean and follow necessary procedures for its longevity.

An accidentally or fortunately taken decision of possessing Bio-sand filters has changed the destiny of my family. Now I want others also to realize the importance of safe drinking water for their family health and wealth- Murti Devi

AUDIT REPORT

We have audited the attached Balance Sheet of M/S Network For Youth Development and Health Environment (NYDHEE) as at 31st March 2019, the Income & Expenditure Account and the Receipt & Payment Account for the year ended on that date annexed thereto. These financial statements are the responsibility of the management. Our responsibility is to express an opinion on these financial statements based on our audit.

We have obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit in the accordance with the generally accepted auditing practice. We have carried out such test and other procedures as we considered necessary in the circumstances as evidence supporting the amounts and disclosures in the financial statements, so far as appears from our examination of the books. In our opinion, proper books of accounts have been kept.

In our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view in conformity with the accounting principles generally accepted in India.

(a) In the case of the Balance Sheet, of the state of affairs of the above named institution as at 31st March 2019;

(b) In the case of the Income and Expenditure Accounts of excess of Income over Expenditure of its financial year ended on that date;
